

Tiger Electric Winch RC Series

The RU model is relatively new to our tiger range, it still has the same wonderful characteristics, compact but strong, beautifully finished and keen to do any job you put in front of it. The additional feature of this winch is that it has a longer rope capacity.

The Tiger RU series winches are of planetary design, compact and engineered to exacting standards. Built with a precision and efficient three stage planetary gear box, quality roller bearings feature throughout.

An independent electromagnetic failsafe multi disc brake provides safe, easy load control. The RU Series Tiger winch features, as all Tiger Winches do a low voltage safety control system, 10 metre push button pendant control with Emergency Stop as standard.

BUILT TO COMPLY TO AUSTRALIAN STANDARDS

Applications

These are capable of a endless range of applications

Hauling - including use as a boat ramp winch

General lifting

Lifting sullage pumps

Use in Agricultural environments, water pump installations etc.

STANDARD FEATURES

240V Motor – They are designed with maximum torque in mind.

They have huge duty cycles and are built to be incredibly reliable

Special expertise is used in the design and manufacture of these motors to suit craning and winch applications.

Pre-wired for 240V Single Phase with 3 pin plug.

Wire rope with safety hook.

Low voltage push button pendant control with 10m lead—everything you need to bolt it down and ready for operational use immediately.

**PLEASE TAKE A MINUTE – THIS MAY SAVE A LIFE
OR AT THE VERY LEAST YOU MIGHT FIND THIS INTERESTING**

We have been selling and servicing Tiger Winches for more than 15 years, they are incredibly durable, safe and fantastic value for money. Your Tiger Winch is fitted with a multi disc brake system which is second to none.

Whichever Tiger Winch model you make yours they all incorporate a safety 24 Volt Pendant Control system with 10 metres of pendant control wire complete with an emergency stop button.

What does all this mean to you and your family

It means you can have absolute confidence and peace of mind when using your tiger winch, if for any reason the power is shorted out or the supply interrupted, or if you have to leave your winching operation for any reason the brakes are applied immediately. You can be assured the multi disc brake safety system will absolutely stop and hold your load.

We have hundreds of these beaut, tough little units in service in some of the most severe circumstances, for example where they are close to water such as pontoons etc. This is where the low voltage controller comes into its own, let's say the controller gets broken and the internal wires are exposed or it is submerged in water, a tingle is all you will receive. The controller being low voltage 24 Volt power – not 240 or 415 Volt - cannot "hurt" you. Your Tiger Winch is one of the very few to offer this safety system on 240V as well as 415V winches.

For that little added safety and security the pendants on the Tiger Winches have a quick disconnect system so when your winch is not in use, no one else can tapper with it.

WIRELESS REMOTE SYSTEM

Please check out this brilliant option. Your Tiger Winch is so easy to use with this simple option. The best news of all is, as far as we know your Tiger Winch is one of the only winches that offer a completely wireless system whilst retaining your pendant control at the same time. This is fantastic news, if a flat battery may occur in your wireless system, you will still have backup. If a 24V pendant controller is broken, you will still have the wireless opportunity.

DON'T FORGET WE OFFER A FULL 2 YEAR WARRANTY ON ALL OUR PRODUCTS
